

# DUAL LIQUID TRIGGER SPRAYER

## DLS 200

- ✓ Saves time and labour costs as it eliminates the need for messy and inaccurate dilution process.
- ✓ Outlasts conventional trigger sprayer by 500 to 1.
- ✓ 99% reduction in plastic disposal per device.

### CHEMICAL SPRAY EQUIPMENT

The Cyndan Dual Liquid Trigger Sprayer dispenses two liquids simultaneously.

Its dilution control dial allows the user to adjust the dilution of the two liquids, making it suitable for a concentrated liquid with various applications dependent upon its dilution rate to water.

Designed to be used with your own bulk chemicals which can be refilled by a funnel, the Dual Liquid Trigger Sprayer is made with high quality components for longevity.

### SPECIFICATIONS

- Bottle capacity - 325ml
- Pump capacity - 1.15 ml pump volume/stroke
- Height with bottles - 286mm

## DLS 200

DLS 200 Variable-Dilution Sprayer

## USER MANUAL

Instructions to fill or refill the DLS200 spray bottle:

1. Turn the blue & green tabs clockwise to the off position, remove the spray head.
2. Fill the "solution bottle" to the bottle shoulder line.
3. Fill the "water bottle" to the bottle shoulder line using water from your tap.
4. Replace the spray head and turn the blue and green tabs to the "ON" position. This will now lock your bottles in place.
5. Select a level of dilution, dial it in and off you go.

Dial Setting	Dilution rate	Duty	Applications
#5	1:5	Heavy	For cleaning grout lines, difficult soap scum, or for any heavy soil build up areas.
#4	1:10	Medium	For more difficult soils or things cleaned less frequently.
#3	1:20		
#2	1:40		
#1	1:50	Light	Mirrors, walls, glass, light dusting, fresh carpet stains, counter tops.
#0	1:60
